

Cervical Cancer

IMAGINE A MOTHER OF 2 ADOLESCENT KIDS
DIE AT THE AGE OF 40 !.....DUE TO
DELAYED CERVICAL CANCER DIAGNOSIS

Dr.Padala Haabitha

Gyneacologist

Hi. I'm Dr. Padala Habitha!

OBSTETRICIAN & GYNAECOLOGIST

Hi, I'm Dr. Padala Habitha, an Obstetrician & Gynecologist, Infertility Specialist, Laparoscopic Surgeon, and Colposcopy Specialist.

I am passionate about providing compassionate, evidence-based care for women at every stage of life. Through this health blog, I share trusted medical insights, practical health tips, and reliable guidance to help women make informed decisions for a healthier and happier future.

My goal is to empower every woman with the knowledge and confidence to take charge of her health.

CERVICAL CANCER

- ✓ Cervical cancer is the second most common cancer among women in India — and what makes it especially heartbreaking is that it's one of the most preventable cancers we know of.
- ✓ A lot of the burden in India comes down to one thing: most women simply aren't screened regularly, so cancers are often caught late instead of early, when treatment works best.
- ✓ Telangana and Andhra Pradesh actually have a long history with this fight — some of the earliest and most important Indian studies on screening methods like VIA, Pap smear, and HPV testing were done right here in peri-urban Andhra Pradesh.

Journey to Parenthood

Dr. Padala Habitha explained every step of my cervical cancer screening with patience and care. The process was smooth and reassuring.

I was anxious before my colposcopy, but Dr. Habitha made me feel comfortable and answered all my questions. Excellent care.

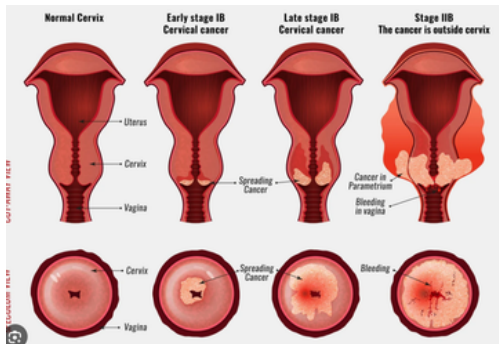

CERVICAL CANCER

- ✓ A Pap smear every three years sounds simple, but it's genuinely one of the most powerful tools we have — it catches changes in the cervix years before they'd ever become cancer.
- ✓ For women above 30, HPV DNA testing is often a better option — it's more sensitive and can pick up risk earlier than a Pap smear alone.
- ✓ If you have daughters between 9 and 14, the HPV vaccine is worth strongly considering — data now shows it could cut HPV16 and HPV18 infections by nearly 97% over their lifetime.

Journey to Parenthood

Thanks to Dr. Habitha, my cervical health issue was detected early. Her expertise and compassionate approach gave me confidence throughout.

The hospital provided a clean and comfortable environment, and Dr. Habitha's professionalism made the entire screening experience stress-free.

CERVICAL CANCER

- ✓ The hard truth is that many women in our region are still diagnosed at a later stage, not because the disease is unbeatable, but because screening simply wasn't done in time.
- ✓ This gap is even wider in rural areas, where regular access to a gynecologist or screening camp isn't always easy to come by.
- ✓ Small everyday choices help too — avoiding smoking and practicing safe sexual health go a long way in lowering risk.
- ✓ Here's the part that matters most: cervical cancer is one of the few cancers where regular screening alone can prevent most deaths. That's not just medical optimism — that's a fact worth acting on.

Journey to Parenthood

“Dr. Habitha encouraged me to undergo a preventive screening, and I'm grateful for her guidance. She truly cares about women's health.”

“From consultation to follow-up, I received exceptional care. I highly recommend Dr. Padala Habitha for cervical cancer screening and women's health.”

WHO I WORK WITH

I work with women of all ages, providing expert care in pregnancy, fertility, gynecology, PCOS management, preventive health, and menopause. My goal is to offer compassionate, personalized care for every stage of a woman's life.

WHAT YOU CAN EXPECT

At Juhith Adithya Hospital, you can expect compassionate care, expert medical guidance, personalized treatment, and a patient-first approach. We are committed to supporting you with trusted healthcare at every stage of your journey.
